Message

It is quite gratifying to note that the Department of Environmental Science of our college is hoisting its First National Online Conference on Recent Trends in Science & Technology (RTST -2021) in collaboration with Department of Botany , Indraraj Arts, Commerce & Science College, Sillod Dist-Aurangabad on 22nd February , 2021.

Organizing such an event at this point of time reinforces our objective of developing an environment for the exchange of ideas towards development of science & technology fields. I wish the conference would be able to deliberate on current issues of national relevance , particularly in the fields of chemical, biological, environmental, life science, Engg. & Technology etc.

There have been unprecedented number of quality papers that are to be presented in the conference . I am sure that this occasion will provide an affable environment for the researchers and academicians to freely exchange the views and ideas with others. I convey my warm greetings and felicitations to the organizing committee and the participants and extend my best wishes for the success of conference.

With regards !

Dr. R.E. Khadsan

ABSTRACT:

Present research work deal with synthesis of 5-p-tolylthiocarbamido-1-naphthol and check their antimicrobial activity against four human pathogens. This molecule was synthesized by condensation of 5-amino-1-naphthol with p-tolyl isothiocyanate in acetone medium. Recently here focus to assert antimicrobial activity of this molecule against gram positive and gram negative human pathogen bacteria such as E. coli, Proteus vulgaris, P. aeruginos and S. aureus. Comparatively L4 showed highly activity against E.Coli rather than remaining three pathogens. This antimicrobial activity relationship confirmed that this compound is a potential candidate for future drugs discovery and development.

ABSTRACT:

In the present study ultrasonic velocity (v), density (ρ) and viscosity (η) have been measured at frequency 1 MHz in the binary mixtures of Atorvastatin with water in the concentration range (0.1 to 0.0125 %) at 303 K, 308 K, 313 K using Multifrequency ultrasonic interferometer. The measured value of density, ultrasonic velocity, and viscosity have been used the acoustical parameters namely adiabatic compressibility (κ), relaxation time (τ), acoustic impedance (z), free length (L_f), free volume (V_f) and internal pressure (P_i), Wada's constant (W), Rao's Constant (R), cohesive energy (CE) were calculated. The obtained results support the complex formation, molecular association by intermolecular hydrogen bonding in the binary liquid mixtures.

ABSTRACT:

Present study is on our own critical observations on fresh plant material collected from the different parts. The observations are also based on herbarium specimens. Relevant data from literature have been referred for comparative study and conclusion including recent nomenclature. The study of *Eleocharis* R. Brown provides a detailed taxonomic description, illustration and relevant information for its easy identification in the field. Two species are collected and are described. The present report is hoped to provide basic material for further research in Cyperaceae.

ABSTRACT:

In the present Study total 10 heavy metal resistant *E. coli* were isolated from sewage of industrial effluents from waste water of Khamgaon MIDC area. Against copper, aluminium, iron, nickel and chromium. All the isolates exhibited high resistance to heavy metals with minimum inhibitory concentration for heavy metals ranging from 50 ug / ml to 500 ug / ml. All isolates showed multiple tolerance to heavy metal and were multi antibiotic resistant, heavy metal tolerance test indicated maximum microbial tolerance of *E. coli* to chromium (480 ug / ml) and lowest to Copper (60 ug / ml).

ABSTRACT;

In the present study, physico-chemical and microbiological characteristics of different sources of surface and ground waters in Shegaon town were determined during winter 2020. The objective of the study was to assess the suitability of water for human consumption and other domestic purposes. Water samples from three different densely populated localities were collected and analyzed for various parameters using standard methods. The physico-chemical parameters of home well water was satisfactory whereas bore well water exhibited all the values as exceeding maximum permissible limit with a few exceptions of sulphate and dissolved oxygen in bore well water. The microbiological analysis revealed that with the exception of bore well water, all other waters fail to satisfy the prescribed standards set for drinking water. Therefore, the study revealed that the entire water samples investigated in the present study failed to qualify the prescribed standards for drinking water either in the physico-chemical aspects or in the microbiological aspects or both. In conclusion, effective preventive measures are to be taken immediately to save these water resources of Shegaon as it is an area of faster development and dense population.

ABSTRACT:

Water is one of the most precious natural resource, essential for all activities of human beings as well as all life forms. Fresh water is consumed for domestic, industrial, agriculture, and commercial sectors. Use of water entirely depends on the quality of water. Polluted water affects health of human, plants and animal in different ways. Major sources of ground water contamination include solid waste dumping, industrial effluents, domestic waste water and some natural sources. Heavy metals are usually discharged through waste materials from domestics, industries and agriculture too. From huge debris of solid waste dumping, and sanitary landfill techniques, heavy metals get accessed to the groundwater through percolation and leaching. Percolating water carries large amount of heavy metals and get accumulated in aquifer and contaminate ground water. The consumption of heavy metal contaminated ground water cause variety of disorders and disease to the human and plants. This study was carried out to investigate the pollution of bore well water in residential areas of Shegaon City, Dist. Buldana Maharashtra, India. In this research, five samples were taken from residential areas of Shegaon City, 1) SBI Colony, 2) Rajeshwar Colony, 3) Shriram Nagar, 4) Akot Road 5) Alasana Road and analyzed to find out concentration of Arsenic, Lead, Cadmium, and Mercury. Five Samples were analyzed using Atomic Absorption Spectrophotometer (AAS).

ABSTRACT:

Safe disposal of industrial wastewater has become a challenge for industrial managers and for scientists also. Rapidly increasing industrialization and urbanization have resulted into the generation of huge quantities of wastewater. Use of untreated industrial wastewater for crop irrigation is a common practice by the farmers. The immediate solution that seems to the problem of water shortage is the reuse of wastewater generated from industrial operations and domestic usage after the suitable treatment in agriculture and related activities. The present research work deals with the study of effects of industrial wastewater irrigation on the soil characteristics of nearby area in Buldana District of Maharashtra. The data obtained in present study indicates that EC, Phosphate, TS, TDS, TSS, Ca,Mg etc., values in fertilizer wastewater whereas pH,TA,TH,Cl₂ values are maximum in sewage water of Khamgaon MIDC. At Sugar Industry sites, EC, Temp., phosphate, TDS, Ca, Mg, Cl₂ values in wastewater are maximum. Organic Carbon, Available N, K, P, Na, SO₄, Cl₂, Mg, Fe, Cu, Zn and Mn were comparatively higher in wastewater irrigated soils than the tube well irrigated soil.

ABSTRACT:

In the present era also 60% of medicine has plant base and many people still uses herbal/ Ayurvedic medicine which are originated from plants. *Alternanthera sessilis*, Family: Amaranthaceae is a very nutritive and mineral rich plant. So the plant was selected and from Barshitakli area and its critical screening for nutritive such as Moisture content, Total ash content, water soluble content, Acid insoluble content, water soluble extractive value, alcohol soluble extractive value, Carbohydrate, protein, Crude fat, crude fiber, and calorific value was done also detection and composition of mineral content such as Sodium, calcium, potassium, phosphorus, Magnesium, Zinc, Iron, Copper, Manganese, and chromium was done. It was found that the plant was rich in nutritive and mineral content.

ABSTRACT:

The present work was based on a preliminary survey of the snail species infected with parasites. Snails were collected from five different freshwater bodies from Nandurbar District, identified and examined for infection. Ten snails of each species from each site were examined. The Study shows that cercaria is more in number in snails and is also found in water of freshwater bodies.

ABSTRACT:

2-amino- 4H-chromenes represent an important class of compounds being the main component of many naturally occurring products. The basic structural frameworks of chromene for example is a common feature of many tannins and polyphenols found in tea, fruits vegetables and red wine. Derivatives of chromene are an important group of compounds found in plants including fruit and vegetables. chromene are biologically active with wide range of activities such as antimicrobial, mutagenic, antiviral, antiproliferative and central nervous system activities. In this research work substituted 2-amino 4H-chromenes were synthesized by one pot synthesis method by interaction with substituted benzaldehyde, β -naphthol, and malononitrile by using sodium bicarbonate as catalyst. The yield of product is found to be very good. The synthesized compounds were recognized by IR, NMR and mass spectroscopic technique.

ABSTRACT:

The present study objectively conducted to analyze physico-chemical properties of soil sample of Sahur village. The study area was divided into four sampling stations to cover the whole farms of Sahur village Ashti tahsil comprehensively in the April 2020. During the study Moisture, pH, EC, Carbon, Calcium carbonate, TDS, Magnesium, Calcium, Nitrogen, Copper, Potassium and Phosphorous content, were analyzed.

The study revealed that the pH of the soil samples ranged from 7.70 to 8.4 and was on slightly alkaline side but within the limit of 6.5-8.5 which is optimum for crops. EC values ranged from 0.4ms to 0.8ms. and indicating low salinity status of the soils. OC content ranged from 1.30% to 1.65% and all the samples were of medium rating. Available nitrogen ranged from 245 kg/ha to 271kg/ha; available phosphorous ranged from 19.50kg/ha to 24.0 kg/ha and samples were nitrogen and phosphorous deficient. Potassium ranged from 445 kg/ha to 645 kg/ha and samples were of medium rating except one sample of high rating with respect to potassium.

ABSTRACT:

The COVID-19 is a major and wide global issue concern to the health of human being, it can lead to various severe problems created adverse impact on various agro-based sectors including poultry farming. Researchers from different fields has studied about the issues and have addressed the possible impacts of COVID-19 on variety of complex issues and problems associated with the poultry farming. Therefore, the present study aimed at to assessed the condition and challenges of COVID-19 by linking its impact on poultry farming with dependent peoples. The pandemic and lockdown impacted the overall poultry production system. This creates a result in drastic reduced value of consumption of poultry products. The study was conducted based on primary data collection, during the same period and its connection with poultry farming, its production, demand and supply was analyzed. Due to the situation of COVID-19 farmers faced various issues related to their need like low income, labor issues, starting of production, transportation problems, low demand of consumers, financial issues were identified. The present study shows that the impact of COVID-19 and its overall scenario on three different selected poultry farms in Aurangabad district. To assessing the impact on these farming a systematic study carried out with the help of collection of primary data from the study area, which provides the information about the impact on different parameters in the poultry farming.

Physico-chemical analysis of ground water quality from Chohata Bazar, District-Akola

P.V.Harne and V. S. Mangle

Department of Environmental Science,
Arts, Science & Commerce College Chikhaldara Dist. Amravati.

ABSTRACT:

Ground water is the main source of drinking, irrigation and for industrial purpose. Bore well water sample were collected from Six sampling points i.e. Takali, Nakhegaon, Karodi, Chohatta, Kinkhed, Mahalakshimgaon. Which was analyzed by standard analytical methods and Physico-chemical analysis was carried out in the laboratory. The physical parameter like Colour, Temperature, Turbidity, Total dissolved solids and Conductivity. Chemical parameter like pH, Dissolved oxygen, Total hardness, Phosphate, Sulphate, Nitrate, etc. were analyzed. Each parameter was compared with the standard desirable limit of that parameter in drinking water as prescribed by different agencies such as WHO standard and ISI standard. After the study it concluded that water is salinity affected i.e. water is not use for drinking purpose.

ABSTRACT:

Several 3-aryl-4-S-benzyl-6-phenylimino-2-hepta-O-acetyl-β-D-maltosylimino-2,3-dihydro-1,3,5-thiadiazines (hydrochloride) were synthesized by the interaction of N-hepta-O-acetyl-β-D-maltosyl isocyanodichloride with 1-aryl-5-phenyl-2-S-benzyl-2,4-isodithiobiurets. N-hepta-O-acetyl-β-D-maltosyl isocyanodichloride was prepared for the first time by the excess chlorination of hepta-O-acetyl-β-D-maltosyl isothiocyanate. The identities of these newly synthesized N-maltosides have been established on the basis of usual chemical transformations and IR, ¹H NMR and Mass spectral studies. The title compounds have been assayed for their antimicrobial activity against gram-positive microorganisms as well as gram-negative microorganisms.

ABSTRACT:

In the new research field of parasitology have started by knowing the different Physiology & Biochemical aspects of the parasite right from the beginning of the Twentieth Century. Helminth worms in general lead a parasitic mode of life. In Biochemical study of helminth worms or cestode, the percentage of protein, glycogen and lipid in the body of cestode investigated. The lipid contents of many tap worms have been investigated which varies from 3% to 6% of fresh weight of the parasite. The lipid content of the cestode parasite varies considerably from species to species. This is the study of Biochemical Distribution of lipid in the body of Cestode *Lytocestus Ambae* from a fresh water fish *Clarias Batrachus*.

ABSTRACT:

This investigation determines ground water quality in of some Murtizapur Tahesil region of Akola District in Maharashtra. Samples collected from various bore wells used as drinking water. Use of pesticides for farming in this region has resulted in the contamination of ground water. The physico-chemical parameters such as Electrical conductivity, pH, Total hardness, Mg hardness, Ca hardness, Mg⁺⁺ ions, Ca⁺⁺ ions and Chloride ion were investigated to determine the present condition of the groundwater quality during the periods of three months from December 2019 to Jan 2021.

ABSTRACT:

Nutrient medium provides an ideal condition during *in vitro* development of plant tissue. The pH of medium is important factor of successful micropropagation besides different medium constituents and other growth components. The experiments were conducted to monitor the changes over time, decline of medium pH and to determine the effect of medium pH on shoot multiplication rate of banana var. Grand Naine. The medium pH was adjusted from pH 5.00 to 6.00 before addition of agar. Results of the experiments concluded that, change of medium pH significantly affects shoot multiplication rate, average weight of shoot clumps and number of roots per shoot. The gelling strength of medium is also affected by changes in pH. The decline in medium pH also observed during storage, but the medium stored in dark condition do not showed change of medium pH. However, prolonged incubation of explants deflects medium pH changes to acidic.

Pattern Recognition in Medical Images using Moment Invariants

Agarkar V. V.

Assistant Professor, Department of Computer Science, Shri. D. M. Burungale Science & Arts College, Shegaon (M.S.), India vinodvagarakar@gmail.com

ABSTRACT:

Digital technology has revolutionized our lives. Digital imaging in medical provides rapid and improved way of diagnostic information. Digital images can be viewed immediately on a screen and also can be viewed simultaneously at different locations. The ability to manipulate a digital image offers enormous diagnostic advantages. Pattern recognition plays a significant role in digital image processing. Pattern recognition is the process of recognizing patterns by using machine learning algorithm. Pattern recognition can be defined as the classification of data based on knowledge extracted from patterns. Moment invariants have been proposed as pattern features in classification and recognition applications. Moment invariants can be applied to many different aspects of image processing like pattern recognition, image normalization, image registration, focus/defocus measurement, and watermarking. This paper deals with the study of moment invariants for pattern recognition in medical images.

ABSTRACT:

Fish is important nutrient source of protein because it contains more than 60% of protein source. The advantage of fish as a food is that it has easy digestibility and nutritional value. The range of bacterial genera isolated which are related to the aquatic habitat of fish. These include the change in flora during storage. Some disease-causing pathogenic bacteria grow on fish which can survive in freezing temperature and will resume growth when thawing. The bacterial species that are facultative pathogenic for fish and human being and may be isolated from fish without apparent symptoms of the disease. In assessment to isolate and identified these pathogenic bacteria from different variety of fish parts such as Skin, Gills, Intestine, Buccal cavity and study their trends of susceptibility and resistant pattern with various antibiotic, the present work was undertaken. In this study pathogenic bacteria such as *S. typhi*, *S. aureus*, *P. aeruginosa*, *E. coli* Were isolated. This study demonstrates that fish is potential source of infectious diseases. In antibiotic resistant *E. coli* and *S. typhi* was more resistant to gentamycin, and ampicillin. It was also found that *S. aureus* more resist to gentamycin, ciprofloxacin as compared to amoxicillin, erythromycin, chloramphenicol.

ABSTRACT:

Present work mainly focuses on to determine the efficacy of methanol extracts of plants against multidrug resistant Gram negative bacteria. These bacteria were isolated from clinical samples by standard microbiological procedure. Multi drug resistant bacteria selected on the basis of antibiotic susceptibility test by Kirby-Bauer disc diffusion method.

Methanol extracts of *Ocimum sanctum*(tulsi) and *Azadirachta indica* (neem), were tested for antibacterial activity against the selected multidrug resistant bacteria by agar well diffusion method. From different samples multidrug resistant gramnegative bacteria isolated *Escherichia coli*, *Klebsiella pneumonia* and *Pseudomonas spp.* *E. coli* dominant in number. *Ocimum sanctum* were found to be most effective with zone of inhibition rang (11-15mm) than *Azadirachta indica* these medicinal plants having antibacterial activity can be used as a alternative source of medicine.

Gymnema sylvestre (Retz.) R.Br. ex Schult. is much branched, twining shrubs with terete stem belonging to family Asclepiadaceae. Its leaves are medicinally exploited to treat several diseases and disorders. Being an important ayurvedic drug it is deliberately adulterated. Phytochemical studies in this leafy drug are carried out to standardize and detect the adulteration in it. The phytochemical studies include details of characters of leaf powder like colour, odour, taste, Alkaloids, Anthraquinone, Iridoids, Saponins, Steroids, Tannins (Qualitative) and dry matter, bulk density, nitrogen, Water soluble nitrogen, crude protein, crude fat, crude fiber, total ash, acid insoluble ash, acid soluble ash, water insoluble ash, water soluble ash, calcium, reducing sugar, total sugar, non-reducing sugar, cellulose, gross energy, phosphorus, extractive values in 10 solvents (Quantitative). The above parameters can be applied to standardize this leaf drug.

Bioremediation of heavy metal polluted environment by microbial and plant assisted techniques.**Chaitanya R.Khadan**

III Year (VI Semester) Anuradha College of Pharmacy, CHIKHLI – 443201 Dist-Buldana (M.S.) [India]

Email :- chaitanekhadan855@gmail.com**ABSTRACT:**

The hazardous waste materials, organic pollutants and heavy metals has adverse effect on environment and adversely affected the natural ecosystem to the detriment of man. These pollutants arise from anthropogenic sources as well as natural disasters such as hurricanes and volcanic eruptions. Toxic metals could accumulate in agricultural soils and get into the food chain, thereby becoming a major threat to food security. Traditional and physical methods are expensive and not effective in areas with low metal toxicity. Bioremediation is therefore an eco-friendly and efficient method of reclaiming environments contaminated with heavy metals by making use of the inherent biological mechanisms of microorganisms and plants to eradicate hazardous contaminants. This research deals with the toxic effects of heavy metal pollution and the mechanisms used by microbes and plants for environmental remediation. It also focused on the importance of modern biotechnological techniques and approaches in improving the ability of microbial enzymes to effectively degrade heavy metals at a faster rate, highlighting recent advances in microbial bioremediation and phytoremediation for the removal of heavy metals from the environment as well as future prospects and limitations strictly taking into consideration bio-safety regulations in the use of biotechnological methods to ensure safety of the environment.

ABSTRACT:

The main focus of this study was to isolate some antibiotic producing actinomycetes strains from Halo alkaline water of Lonar Lake. Isolation of soil actinomycetes was done by culture-dependent methods and Furthermore, microscopic examination.

Total of 17 actinomycetes strains were isolated from the alkaline water of Lonar Lake and screened for their anti-bacterial activity. They were evaluated for their inhibitory activities on four test microorganisms. Five actinomycetes isolate which exhibited antimicrobial activity against at least two of the test organisms and were characterized by conventional methods. The cultural characteristics of isolates were also studies in different culture media. The results indicated that two isolates were highly active against *Staphylococcus aureus* strains. Most of the isolates inhibited growth of the Gram negative bacteria tested. These microorganisms may have capability to produce some of the most important medicines ever developed.

ABSTRACT:

The Internet of Things is a methodology towards making an existence where all things, people, and services are interconnected with one another through the Internet and can connect and work together with one another to contribute towards collection, storage, exchange and monitoring of data. In the advancement of healthcare monitoring systems, the Internet of Things has become a vital factor. The goal of an effective IoT healthcare system is to provide remote monitoring of patient health conditions in real time, to avoid critical patient conditions and to improve the quality of life through intelligent IoT environments. This paper deals with the Internet of Things (IoT) and its applications in the healthcare. The main objective of this paper is to simplify the concept of IoT and aware the reader to the present trends used in IoT healthcare.

Title of the best practice: Yoga and Meditation Workshop

The Context: In the era of science technology it is observed that youths are detached from the good habits like physical fitness, yoga and meditation. As the youths are the building block of our nation they should be academically, physically, mentally strong. In this context our department decided to conduct yoga meditation workshop for student to inculcate the physical as well as mental fitness habits in students.

Objective of the Practice:

- The goal of institution is to aware the students about physical fitness
- Teach the student different yogaasans and pranayama and meditation techniques
- To make them know about the benefits of yoga pranayama and meditation
- To develop the interest about the physical fitness through yoga meditation and pranayama

The practice

Department of electronics has organized three-day workshop on yoga and meditation from 27 July to 29 July 2021 in collaboration with The Art of Living Foundation. 109 student of college get benefited by the activity. Mr Ajay daware (Art of living teacher) from khamgaon and Mr. Manoj ingole (District Teacher Coordinator of art of living) from karanja has successfully conducted the workshop from morning 8.00 am to 9.30 am for three days. Where they taught different aasanas like vajrasan, padmasan, marjari aasan, pavan muktasan, naukasan, tadasan, pshimotanasan etc. pranayama like kapal bhati, bramari, nadishodhan, bhastrika. They focused not only on the teaching but they elaborated all the benefits and steps very nicely also explained different technics of body and brain relaxation technique called meditation.

Advantages:

- Students of the college became aware about physical fitness importance
- Students get benefitted by scientific and proper knowledge from expert resource persons

- As the activity is performed on online platform family members of the student also participated on the same platform.

Challenging issues:

- To create interest in the student about activity
- To convince the student about participation

Evidence of success:

- Number of student express and admitted the feedback that this type of practice gives them healthy and energetic life.

Resources required:

- Expert faculty in yoga, pranayama and meditation
- Technical support team as this workshop is conducted on online mode

Session -2021-022

Report of Seminar & Books Exhibition

On The occasion of “World Book Day” 23/04/2022

ShriDnyaneshwarMaskujiBurungale college organized Various educational, social and cultural programs under the guidance of ShriRamVijayjiBurungale.. 23 April is celebrated

worldwide as World Book Day in the memory of William Shakespeare. As part of this, Department of library organized book exhibition and invited talk on title 'Vachalervachal'. For this occasion Dr. R.E. Khadsan sir presented as president of the program. He said reading enriches one's language and thoughts and also discussed various facets of the topic.

As chief guest prof.

Nilesh Dewar, Librarian, Shri G.B. Murarka Arts & Commerce College, Shegaon, was present on the dais. He said that, instead of reading when you are having time, read regularly; it will definitely make a difference in your intellectual capacity. For this program, IQAC coordinator of college Dr. Ajay Wadekar and librarian Dr. R.K. Jawanjal were present on the dais. Dr. Ms. Ranjana Jawanjal explained the importance of World Book Day and introduced the chief guest. The program anchoring was carried out by Ms. Nishita Santoshi. A vote of thanks was proposed by Dr. Ranjana Jawanjal. All teachers and non-teaching staff and 130 students were present for this event.

Brief History of Srinivasa Ramanujan

1. Srinivasa Ramanujan was born in small village Erode in Tamil Nadu on 22nd December 1887.
2. During the School time he came across the book "Synopsis of Elementary Results in Pure Mathematics" by G. S. Carr. So he was influenced by this book and began working on mathematics by his own style of summing geometric and arithmetic series.

ACADEMIC SESSION 2019-2020

श्री.ज्ञानेश्वर म. बुरंगले विज्ञान व कला महाविद्यालय

ग्रंथालय विभाग

सत्र-२०१९-२०

अहवाल

श्री.ज्ञानेश्वर म. बुरंगले विज्ञान व कला महाविद्यालयात मा. श्री.रामविजय जा. बुरंगले यांच्या मार्गदर्शननाखाली विद्यार्थ्यांच्या सर्वांगीण विकासासाठी महाविद्यालय वेळोवेळी विविध कार्यक्रमांचे आयोजन केले जाते. त्याचाच एक भाग ग्रंथालय व माहितीशास्त्र विभागाच्या वतीने आयोजित बौद्धिक संपदा कायदा: जाणीव जागृती या विषयावरील परिसंवादात बोलतांना चिखलीच्या शिप्रम महाविद्यालयाचे प्रा.डॉ.प्रदिप बारड यांनी देशाची प्रगती ही विकासावर मोजली जाते आणि विकास हा संशोधनावर अवलंबून असतो. संशोधनात मोठ्या प्रमाणात वाढ आणि त्यातून पेटंटची संख्या वाढायला हवी असे मत व्यक्त केले. यावेळी मंचावर प्राचार्य डॉ. रामेश्वर खडसान, प्रा.डॉ. पि.व्ही. पिंगळे, प्रा.रंजना जवंजाळ उपस्थित होत्या.

कॉपीराईट,पेटंट, ट्रेडमार्क इत्यादी कायद्याची माहिती देवून पेटंट नोंदणी म्हणजे संशोधनाची उपयोगिता समाजासाठी निर्माण करणे होय. बरेच लोक संशोधन करतात पण ते संशोधन समाजासमोर येत नाही अशी खंत प्राचार्य डॉ. खडसान यांनी आपल्या भाषणातून व्यक्त केली.

भारतातील ग्रामीण भागातील संशोधक श्री. दादाजी खोब्रागडे सारखे बासमती HMT, वाणाचे निर्माते पासून डॉ.रघुनाथ माशेलकर यांच्या पेटंट आणि पारंपारिक ज्ञानाच्या जतन आणि भारतीय शेतकऱ्यासाठी केलेल्या प्रयत्नाची माहिती देवून हळदी, बासमती, कडुलिंबापासून शेतकऱ्याच्या वाणासाठीच्या, पेटंटची लढाई आणि विद्यार्थ्यांनी या बाबतीत कसे समज असायला हवे. वरील विषय संशोधनासाठी असला तरी विद्यार्थी, नागरिक समजत राहले तर सामान्य शेतकरी, लघु उद्योजकांचेहि साधन जाईल हे सोदाहरण प्रा.डॉ.प्रदिप बारड यांनी पीपीटी आणि चित्रपटातील काही निवडक दृश्ये दाखवून विद्यार्थ्यांना पटवून देवून बौद्धिक संपदेचे रक्षणकरणे प्रत्येकाची जबाबदारी आहे असे स्पष्ट केले.

कार्यक्रमाचे प्रास्ताविक प्रा.रंजना जवंजाळ तर आभार प्रा.डॉ. पि.व्ही. पिंगळे यांनी केले. सदर कार्यक्रमासाठी प्रा.डॉ. मुळे सर आणि विद्यार्थी मोठ्या संख्येने उपस्थित होते.

Proceeding of NAAC sponsored Workshop (Date:- 25th July 2019)

1. Theme of the workshop :

Assessment and Accreditation with the revised framework effective from July 2017 making it more robust and technology enabled. The NAAC accreditation process is a major milestone for every college providing quality higher education. The recent amendments in the NAAC accreditation process not only empower higher educational institutions for enhancing the quality but also focus on all round development and wellbeing of the learner. The current changes in the NAAC accreditation process have necessitated the institutions to undertake several initiatives to improve quality. It has become imperative for the institution to blend technology with quality in order to achieve the goals of the accreditation process. Implementing the newly prescribed revised accreditation framework, computer-assisted assessment systems can greatly aid in demonstrating compliance, increasing collaboration among teaching faculty, and improving the educational experience for teachers and students. In this regards the IQAC cluster India has taken enormous efforts in empowering the IQAC members across the country to face the NAAC accreditation process.

The institute has qualified staff, sufficient support facilities and healthy atmosphere for achieving success in academics and administration.

Workshop theme

Assessment and accreditation with the revised framework effective from July 2017 making it more robust and technology enabled. The NAAC accreditation process is a major milestone for every college providing quality higher education. The recent amendments in the NAAC accreditation process not only empower higher educational institutions for enhancing the quality but also focus on all round development and well being of the learner. The current changes in the NAAC accreditation process have necessitated the institutions to undertake several initiatives to improve quality. It has become imperative for the institution to blend technology with quality in order to achieve the goals of the accreditation process. Implementing the newly prescribed revised accreditation framework, computer-assisted assessment systems can greatly aid in demonstrating compliance, increasing collaboration among teaching faculty, and improving the educational experience for teachers and students. In this regards the IQAC cluster India has taken enormous efforts in empowering the IQAC members across the country to face the NAAC accreditation process.

The IQAC of Shri. D. M. Burungale College under the guidance of IQAC cluster India has organized this workshop which will focus on the changes in the new accreditation process and would familiarize the participants on the various criteria and the stages an institution has to undergo before the accreditation process. This one day workshop will guide you through the process and would provide better insight on revised NAAC guidelines.

Objectives

To discuss the evaluation process and reforms in the higher education. To provide a platform for the institutes to exchange their ideas about the NAAC revised accreditation process. To discuss how to prepare E- documentation reports for IQAC office and departments. To enable paperless office in the institution. Since we are sure, that the present theme of workshop will reach to our expectation and will be contribute to sustain quality and quality enhancement, endorsement and sharing of best practices and students participation in quality improvement related issue in better education.

Discussion themes

- 1) To discuss the evaluation process and reforms in the higher education.
- 2) E-Resources used in library.
- 3) Uses of ICT in respective subjects.
- 4) How to prepare E- documentation reports for IQAC office and departments.
- 5) To enable paperless office in the institution.
- 6) Need of ICT awareness and their importance.

MESSAGE

We are greatly honored to invite all the delegates for the NAAC sponsored, state level one day workshop on "Revised NAAC Framework and E-Documentation" to be held on 25th July 2019 at Shri. Dnyaneshwar Muskuji Burungale Science and Arts College, Shegaon.

I personally witness, the growth of the college as one of the best college for science and Arts in Shegaon, since it is started in 2000.

Assessment and accreditation with the revised framework effective from July 2017 making it more robust and technology enabled. National Council for Assessment and accreditation (NAAC) follows very specific and time -bound process for accreditation of higher education institutions. The IQAC has to undergo specific process and timeline which involve the steps as on-line submission of institutional information for Quality assessment (IIQA), self -study report (SSR), Data validation and verification (DVV), and student satisfaction survey (SSS). This is followed by the peer team visit and grade allocation.

There are seven criteria and 34 key indicators. The NAAC addresses all the core aspects of quality education such as curricular aspects, Teaching-learning and evaluation, Research, Innovations and Extension, Infrastructure and Learning resources, Student Support and Progression, Governance, Leadership and Management, Institutional values and Best Practices. The role of stakeholders and their interdependence and the correct dynamic between all these stakeholders provide a robust and high performing quality ecosystem.

We wish to thank all the participants, sponsors and invited speakers and advisory board and volunteers and those who have contributed in the successful organization of great event.

With best wishes

Dear Sir/Madam,

Greetings from NAAC!

This has reference to your proposal seeking financial assistance/academic support for organizing national seminar in your institution. After due consideration your proposal has been accepted for financial assistance of Rs. 75,000/- (Rupees Seventy Five Thousand only). The balance amount required to organize this activity may kindly be mobilized at your end. The Financial assistance is subject to the adherence to the enclosed procedures for release of sanctioned grants and settlement of the same. We appreciate the initiative taken by your institution and hope that you will continue to strive for quality and excellence in Higher Education.

The seminar/workshop has to be conducted on the scheduled date(s) as mentioned in the seminar proposals sent to NAAC. In case of any change in scheduled date, the institution has to obtain prior permission from the region co-ordinator stating the reason for change of dates. In case of any delay in submission of the claims the reimbursement will not be made and NAAC will not be liable for the expenditure incurred.

Yours sincerely,

S. C. Sharma

National Mathematics Day 2020

About Webinar

In our Country- India, we celebrate National Mathematics Day on December 22 to commemorate the birth anniversary of Mathematician Srinivasa Ramanujan. The Indian mathematical genius Srinivasa Ramanujan was born on 22. Dec. 1887. It was in recognition of his contribution to mathematics, the Government of India decided to celebrate his birthday as the National Mathematics Day.

We can't ignore that several initiatives are taken to motivate, enthuse and inculcate a positive attitude towards learning mathematics among the younger generation of the country. National Mathematics Day is celebrated in various schools, colleges, universities, and educational institutions in India. The main objective behind the celebration is to raise awareness among students and people about the importance of mathematics for the development of humanity.

With the same objective our Late Ku. Durga K. Banmeru Science College, Lonar in collaboration with R.A. arts Shri M.K. Commerce and Shri S.R. Rath science College, Washim and Shri Dnyaneshwar Maskuji Burungale Science and Art College, Shegaon organize this webinar on 22 Dec. 2020. For this webinar great personality like Dr. Y.M. Borse is the keynote speaker. He is well known mathematician from Pune.

We request to all students and teachers of any faculty to participate in this webinar.

Pell's equation

Pell's equation:

$$x^2 - Ny^2 = 1$$

To find smallest positive integer solutions.
 e.g. The equation $x^2 - 2y^2 = 1$ has solutions $x = 3$ and $y = 2$.
 Fermat's challenge (in 1657): Solve for $N = 61$ and $N = 109$.
 Bhaskracharya (1150): Already solved!!!
 $N = 61$: $x = 1766319049$ and $y = 266153980$
 $N = 109$: $x = 1580706719866249$ and $y = 15140424455100$
